

MC 1510 (BLUE)

MULTIPURPOSE GREASE

**Provides low wear
Protects heavily-loaded friction units**

APPLICATION:

For rolling and sliding friction units of vehicles and equipment, electrical gears, ship equipment.
Is used in extreme load conditions, high temperatures and pressure (vibrations, hard braking, bumpy ride, rough roads)

Bearings

Gear / cogwheel

Balls

Electrical drives

CONFIRMS: DIN 51502-KP2N-30, Man 284 li-h 2; MB 265.1

DESCRIPTION: Grease has good sealing properties, reduces losses on friction and wear, and promotes recovery of worn surfaces. Used in bearings, gears, rolling and sliding units, electrical gears, ship equipment, etc.

The grease increases the ability to resist high loadings, impact and vibration.
