

MC 1000

Multipurpose metal-plating grease
Provides low wear
Protects heavily-loaded friction units

Application:

For rolling and sliding friction units of vehicles and equipment, electrical gears, ship equipment.

Bearings

Gear / cogwheel

CV joints

Balls

Electrical drives

Description: Grease has good sealing properties, reduces losses on friction and wear, and promotes recovery of worn surfaces.

MC 1000 is metal-plating grease. It contains nano particles that restore surfaces of details and decrease wear and friction.

The grease increases the ability to resist high loadings, impact and vibration.

EP metal plating

NLGI	3
Color	Black
Base	lithium
Temperature	-40°C + 140°C
Penetration	220-250
4-ball machine	785 (80)
Dropping point	185°C

Package: Metal barrels 50kg, 170kg, pails 9kg, cans 200g/400g
Other packaging is available upon request

Manufacture:
VMPAUTO Russia
